# City of Boynton Beach
CDP Cities 2019

This snapshot report presents the score that City of Boynton Beach received for its response to the 2019 questionnaire. CDP uses the scoring methodology to incentivize cities to measure and manage environmental impacts. This report can be used as a tool for gaining an overview of environmental performance and how the city's response can be improved in the future. Responses are scored by CDP and CDP's scoring partner ADEC, using the 2019 CDP Cities Scoring Methodology. Scores are private to cities although CDP will recognize and reward the highest scoring cities.

How to improve your city's score

Next steps for your city

Adaptation	Mitigation
Step 1: Consider analysing future changes in frequency and intensity of the climate hazards facing your city as well as the assets and services that will be affected by them. Step 2: Utilise a comprehensive risk assessment to develop an adaptation plan which will address climate hazards specific to your city. Step 3: Identify how your city will take actions/implement projects to reduce water supply risks to ensure a sustainable and clean supply of water for all.	Step 1: To ensure a thorough emissions inventory, try to include both direct and indirect emissions. Step 2: Begin to define achievable and ambitious emissions reduction goals and consider developing a renewable energy target. Step 3: Consider whether developing a low emissions zone may be a good option for your city in order to reduce congestion and improve air quality.
